

ENGINEERING FINISH

Stereolithography

Typical Applications:

- Design verification
- Form, fit and function testing
- Visualization Models

General Appearance:

- Homogenous surface appearance
- Minor scratches may be visible
(Due to sand paper)
- SLA stair-steps and ridges removed on external surfaces
- Limited finishing on non-visual surfaces
(Unless otherwise requested)

Finishing Process:

- Manual finishing is concentrated on visible surfaces
- Appropriate surfaces conditioned with up to 220 grit sand paper
- All building debris removed and damages repaired
- Glass bead blasted for uniform appearance
