

PREMIUM FINISH

Stereolithography

Typical Applications:

- Silicon mold patterns
- Industrial Design Models
- Master patterns for secondary processes
- Marketing models (painted)

General Appearance:

- All surfaces detailed and painted according to application
- SLA stair-steps and ridges removed on external surfaces
- Moderate finishing on non-visual surfaces (Unless otherwise requested)

Finishing Process:

- Manual finishing is concentrated on visible surfaces
- Critical surfaces conditioned with appropriate grit sand paper
- Reveals, radii, circles and other critical features tightly controlled
- Assemblies continuously checked for proper fit
- Paints are color matched per requirements
